RESULTS

Over 500 clients managed to resolve their social and other problems with psychological counselling support in Leningrad Region (Russia) and North-East Estonia

Joint measures developed for **reduction of HIV epidemic impact** on economic and labour resources of the regions involved

Over 140 representatives of the Russian and Estonian municipal authorities, social workers and decision-making specialists trained on measures for reduction of HIV

Centers of social-psychological support for people living with HIV provide services **in Narva and Johvi** (Estonia), **in Leningrad region** (Russia) the similar **centers will operate in 4 areas** at the expense of the regional budget

Improved socialization of a target group: over 50 clients found a job after training, over 500 clients resolved their social problems, and over 150 clients resolved their legal problems

Partner network involving state and public organizations to ensure close cooperation of state social support institutions with municipal healthcare and public organizations (**45 institutions** involved) **organized**
